Total Marks	50					

I-Composition :

Write paragraph about(your self) (using these words)

only

Date and place of birth

High school

marital status

8

Your wish

name -age

English level

your hoppy

b- Give advise to your a friend to lose weight

- 1)
- 2)
- 3)

II-Reading :

Read the following passage and answer the questions :

Ozone is a natural ,similar to oxygen , which forms layer around the earth . The ozone layer plays an important role protecting life our planet .it acts like a natural filter against the harmful ultraviolet rays of the sun. if these rays reach earth , people will face serious health problems such as skin cancer , eye disease and worker bodies , animals and crops will suffer , too . Unfortunately , the ozone layer is being decreased by chemicals we use every day in refrigerators and air conditioners , making plastic foam and aerosol sprays ,there is already a hole in the ozone over the south pole . We continue to use such chemicals , the hole will become bigger and the ozone layer will get thinner . Countries around the world have recognized the danger of the ozone problem , they have agreed the reduce the production and use of harmful chemicals , you can participate in protecting the ozone layer . don't overuse household cancers , hairsprays , or products that can result in releasing chemicals into the air .

1- What is the ozone ?

.....

only
12

2- Where is the hole of the ozone ?

.....

b-choose the correct answer :

- 1- The ozone layer is by chemicals
